PROFESSIONAL SUMMARY

Systems analyst with over a decade of field experience in electronic security systems — CCTV, alarm, network and monitoring infrastructure — for banking and corporate environments in Brazil, now focused on cloud computing. Postgraduate in Cloud Computing (PUC Minas). Experience deploying containerized APIs on AWS with CI/CD, and applying cloud architecture to the reliability and monitoring of distributed security systems. Invited peer reviewer for the IEEE Internet of Things Journal. Open to US-based remote roles in cloud and systems.

TECHNICAL SKILLS

Cloud & Infrastructure

AWS (EC2, S3, IAM, VPC)
Docker, Nginx, GitHub Actions CI/CD
Node.js, TypeScript, PostgreSQL, REST APIs
Cloud architecture, telemetry

Security & Systems

CCTV, alarm & access control systems
IP networks, remote monitoring
Device health & observability
Fault diagnosis, equipment integration

PROFESSIONAL EXPERIENCE

Cloud Consulting — Electronic Security Systems

Triunfo Segurança Eletrônica · Remote · 2020 – Present

- Cloud-based migration and monitoring of CCTV systems for distributed sites.
- Cloud integration and infrastructure for physical security equipment (cameras, recorders, alarm panels, network).
- Remote support and management of security systems through cloud services.

Electronic Security & Infrastructure Technician / Partner

Sekron / Triunfo Segurança Eletrônica · Brazil · 2005 – 2020

- Installed, configured and maintained CCTV, alarm and monitoring infrastructure for bank branches, retail and corporate sites, including agencies of Banco do Brasil, Caixa, Bradesco and HSBC.
- Network configuration, remote monitoring, fault diagnosis and equipment integration across multiple locations.
- Partner at Triunfo (2007–2018), providing electronic security services for banking and enterprise clients.
- Over a decade of hands-on experience with the reliability and operational continuity of distributed security systems.

CURRENT PROJECT

PSOP — Physical Security Observability Platform

Personal project · in development (lab-validated)

- Cloud platform to monitor the operational health of connected physical-security devices: inventory, telemetry/heartbeat, online/degraded/offline status, incident tracking, MTTR and alerting.
- Validated with real hardware (NVR, IP cameras, router) in a lab environment; multi-tenant, with RBAC, MFA, sessions and audit.
- Built on the BiaoTech API — a production backend on AWS (Node.js, PostgreSQL, Docker, Nginx, JWT, GitHub Actions CI/CD).

ACADEMIC & PROFESSIONAL ACTIVITY

- Invited Peer Reviewer — IEEE Internet of Things Journal (reviews verified via Web of Science), since 2026.
- Submitted four projects to global Devpost hackathons (Google DeepMind Gemini 3, Elastic, DSOC, Techinance).

EDUCATION

Postgraduate — Cloud Computing, PUC Minas

Completed Aug 2026

Bachelor's — Systems Analysis and Development, Estácio, Brazil

2017 – 2020

CERTIFICATIONS

- Oracle Agentic AI Certified Foundations Associate (2026)
- Oracle Cloud Infrastructure 2024 Data Foundations Associate
- Fortinet Certified Associate in Cybersecurity (FCA)
- ISC² CC — course & final assessment completed
- IBM SkillsBuild — Cybersecurity Fundamentals
- Oracle Cloud Infrastructure 2024 Foundations Associate
- Fortinet Certified Fundamentals in Cybersecurity (FCF)
- Certified ScrumMaster (CSM) — Scrum Alliance
- Cisco Networking Academy — Intro to Cybersecurity
- Studying toward AWS certifications
